

MATHS CIRCLE – TIMES TABLES ROCK STARS MULTI-SCHOOL DASHBOARD

PRIVACY STATEMENT FOR SCHOOLS

This privacy statement tells you what we, Maths Circle, will do with your school's personal information if your school agrees to share its data as part of a Times Tables Rock Stars (TTRS) "Multi-School Dashboard", and should be read in conjunction with our main [Privacy Notice](#) available on our websites.

What information do we collect, process and use in the TTRS Multi-School Dashboard and why?

We collect and process data based on the answers given to maths questions, and the length of time taken to answer those questions, by users of the TTRS platform within your school account. We collate and share this data with the users of the Multi-School Dashboard to demonstrate engagement levels, progress, effort and to enable them to easily identify where further intervention might be needed.

NOTE: This data is only presented at a class level, year group level and a whole school level and is not shown on an individual student basis. Names of individual users are not made available anywhere in the Multi-School Dashboard.

But if the data is anonymous, why have you produced this privacy statement?

As set out above, whilst we will be providing information in an anonymised form at class level, if your class name is personalised (e.g. uses the teacher's name) or you have very few students using TTRS, it may be possible to identify individuals (teachers or users). As the data controller, it is your responsibility to ensure the relevant notices are provided to teachers and users of TTRS, to ensure they understand how their data will be used to provide the Multi-School Dashboard.

Why do we need your instructions to share the school data in the Multi-School Dashboard?

If we are your data processor, we (Maths Circle) can only process school data in accordance with your documented instructions (see [our standard Terms and Conditions](#)). This is why we need your express instructions to share your data in this way via the Multi-School Dashboard, even though it will be anonymised.

What if we change our mind?

If at any point you no longer want your school to form part of a Multi-School Dashboard (e.g. your school has left the Trust or school group), you can ask to revoke your school's involvement from the Multi-School Dashboard by emailing us at support@mathscircle.com.

Other information?

Please refer to our main [Privacy Notice](#) for further details about data retention, how we store data, who we share data with etc. For any other queries, please email us at support@mathscircle.com.
